FEATURES

Fabric cover shell

The optional fabric cover shell offers an elegant solution for concealing the fabric roller.

Front profile bracket

Joins the arms securely to the front profile and permits adjustment of the angle.

Arm bracket

Reliable and secure, the arm bracket is made from high-strength aluminium alloy. Its round design matches the contour of the fabric cover shell. Upper arm fork is forged aluminium.

Hinged arm joint

The plastic-coated double cables are designed for an extremely long service life:

- no soiling of the greased cables caused by exposure to the environment
- arm profile and cables of the same colour

The extremely high spring tension of the hinged arms ensures a superbly taut sit of the fabric. No resting of the awning cloth on the arm joints. Hinged arm joints feature a pin made of high-grade steel
