CANTILEVER

Engineered design welded brackets allow awnings to be cantilevered up to 1400mm from wall without need for vertical arm supports.

ARM SUPPORTED

These awnings are arm supported using a state of the art arms and bracket system.

Easy installation allowing angle to be set on site to combat sun aspect.

CURVED

A modern design is the curved awning. The rafted beams are curved to follow curved rooflines.

WINDOW SHADE

Conventional slats allow simple shading to be achieved. Strong welded offset brackets allow clearance from existing windows.

The exiting range of louvred awnings.
